Denso Priming Solution

Brush or spray applied primer for large areas

Composition
Denso Priming Solution is comprised of petrolatum in hydrocarbon solvent.

Uses
Denso Priming Solution is used on large areas of substrate prior to the application of petrolatum tapes and compounds.

Service temperatures: -20°C to +60°C.

Characteristics
Denso Priming Solution is:
• suitable for brush or spray application, and
• easy to apply.

Surface Preparation
Surfaces must be clean, dry and free from rust, scale and non-adherent coatings by wire brushing to St2 or abrasive blast cleaning.

Application
Apply Denso Priming Solution evenly over the surface using a brush or roller to an average dry film thickness of 50 µm.

Application temperatures: -20°C to +55°C.

Cleaning solvent
Denso Priming Solution may be cleaned with white spirit or xylene.

Availability
Denso Priming Solution is available in 5 L tins or 25 L drums.

Storage conditions
Store all components upright in original packaging in a cool, dry, area. Keep away from heat, sparks and open flames.

Waste material
Please avoid or minimise waste wherever possible. Please do not discard waste material, including packaging, in the surrounding environment. Follow all relevant legislation for disposal.
