

A combination of two Steelcoat™ systems to give extra protection in difficult areas such as badly pitted and rusted pipe/steelwork and damp sweating pipe/steelwork

The Steelcoat 100/400™ System is now widely specified due to the superior protection it provides by combining the strengths of the Steelcoat 100™ and Steelcoat 400™ system components.

The combined system comes in two variations: A and B.

Denso Steelcoat 100/400(A) System:

For badly pitted and rusted pipework and structural steelwork.

For pipework, Steelcoat 100/400(A) System comprises Denso™ Hi-Tack Primer followed by a double wrap (55% overlap) of Denso™ Hi-Tack Tape. The outer Denso™ Ultraseal Tape (or Denso™ Ultraseal RT) is also applied with a 55% overlap before painting.

For steelwork, the Steelcoat 100/400(A) System is applied as above with both tapes featuring a minimum 55% overlap before painting.

Once applied the fabric backed Denso Ultraseal Tape (or Denso Ultraseal RT) is overpainted with two coats of Denso™ Acrylic Topcoat.

Denso Steelcoat 100/400(B) System:

For damp/sweating pipework surfaces.

As above 'For pipework' with Denso Paste S105™ replacing the Denso Hi-Tack Primer.

FEATURES

- Cold applied
- Surface tolerant
- Highly conformable
- Ideal for badly pitted and rusted steelwork
- Ideal for damp or humid steelwork
- When applied in accordance with the manufacturer's instructions, the system has been shown to provide a service life of up to 30-years.

STEELCOAT 100/400™ SYSTEM

UK SPECIFICATION*

COMPONENTS

Denso Steelcoat 100/400(A) System:

Denso™ Hi-Tack Primer

Denso™ Hi-Tack Tape

Denso™ Ultraseal Tape or Denso™ Ultraseal RT

Denso™ Acrylic Topcoat

Denso Steelcoat 100/400(B) System:

Denso Paste S105™

Denso™ Hi-Tack Tape

Denso™ Ultraseal Tape or Denso™ Ultraseal RT

Denso™ Acrylic Topcoat

SURFACE PREPARATION

Minimal surface preparation required.

Surfaces must be clean and dry. Remove all loose rust, scale and flaking coatings by hand wire brush.
