

IDEAL COATING
SOLUTION FOR
DAMP SURFACES

PROTAL 7300™ (UK)

Denso's Protal 7300™ is a VOC free, 100% solids epoxy coating specially formulated to coat dry, damp or wet surfaces in either above ground or buried locations.

The new formulation offers improved brushing characteristics for enhanced appearance and film thickness control. Protal 7300 (UK) can be applied by applicator pad, brush or roller in one coat to suitably prepared substrates.

Once cured, it forms a tough, impact resistant coating with excellent adhesion qualities, making it a useful solution to the problem of protecting steel surfaces in difficult environments.

Protal 7300 (UK) is manufactured in the United Kingdom and has gained approval in the National Grid Coatings Register for:

- Product Group 9: MCL for dry surfaces
- Product Group 9c: Multi-component Liquid Repair Materials (for use with MCL and FBE coatings)
- Product Group 10: Multi-component Liquid Coatings for damp surfaces

USES:

Protal 7300 (UK) is used for the exterior coating of pipelines, structures or other steel surfaces that may be wet or damp due to the environment or as a result of atmospheric condensation.

BENEFITS:

- Can be applied to wet or damp surfaces
- High build (up to 1250 µm in one coat)
- Excellent adhesion to wet and damp surfaces
- Excellent gouge, abrasion and impact resistance
