

Winn & Coales (Denso) Ltd Environmental Policy

Winn & Coales (Denso) Ltd has recognised that all its business activities of delivering corrosion prevention and sealing technology have environmental aspects and contribute to broader environmental challenges. Therefore, top management has implemented an Environmental Management System following the guidelines of ISO 14001 to control and mitigate the direct and indirect impacts on the environment of the design, production and supply activities of its products including tapes, liquid coatings, membranes, mastics, primers and jackets.

Winn & Coales (Denso) Ltd and all its employees are responsible for and committed to continually improve our environmental performance and mitigate adverse environmental impacts where practical. We will accomplish this by:

- Complying with all applicable environmental compliance obligations, regulation and statutes;
- Using natural resources wisely whenever practical;
- Using processes, practices, techniques, materials, products, services or energy to avoid, reduce or control the creation, emission or discharge of any type of pollutant or waste;
- Where possible, integrating environmental consideration into business planning and decision making, and building resilience by adapting business activities to current and future environment changes;
- Establishing, implementing and reviewing environmental objectives and targets through monitoring of compliance obligations, aspects and impacts, risks and opportunities, interested parties and internal and external issues;
- Continually reviewing and improving our environmental management system for enhanced environmental performance;
- Fully communicating this environmental policy to our employees and to any other interested parties on request; and
- Providing full training, instruction and supervision for all our staff (where appropriate), together with adequate instructions and notifications for any sub-contractors working under our direction to ensure tasks are carried out in line with our environmental management system.
